

Should I Register as an Individual or Start a Team?

A team is a group of people such as family members and friends who want to participate together, and raise funds together. The donations they make and the donations they collect are totaled together towards the team's fundraising goal.

Teams have a team fundraising goal and individual participants each have an individual fundraising goal. If you plan to participate with family and friends, consider starting a team, coming up with a fun name and start recruiting members.

If you will participate by yourself or with a spouse, you may wish register as individual participants. You will be asked to select an individual fundraising goal when you register.

For assistance registering, please call the PFNCA office at 301-844-6510.
